

## **Order Picker License Oakville**

Order Picker License Oakville - Order preparation operation or order picking as it is more normally known is a method used within warehouse operations and consists of employees called order pickers. The order picker's task is to collect and take articles in certain quantities in order to fulfill the customer's orders before shipment. Order picking is a simple warehousing method. The effectiveness in which this particular task is done could be directly linked to the productivity of a supply chain. Therefore, order picking is one of the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are several specific types of order picking. The main types include: pick to box method, wave picking method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method comprises the order picker filling the box with the items from his or her station. The box then moves to the other picking stations until the client order is complete. In this particular technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move around to gather the needed things for numerous orders. The picker to part method or piece picking is similar where the order picker or pickers move to gather the items needed but for one order only.

In the sorting systems method, there is no movement of the order picking employees. Instead, the products are delivered to her or him by means of an automated system like a conveyor system or an automatic storage. In the zone picking method, each and every order picker is assigned to one particular area. They are responsible for only realizing order picking in this particular zone.
